The offering found homes in Missouri, Iowa, Indiana, and Kentucky, reflecting the continued reach and demand for Leachman Stabilizer genetics.

We extend a special thank-you to **Jack Harrison and the entire sale-barn crew** for their hospitality and hard work. From preparing the facility and handling the cattle to keeping everything moving smoothly on sale day, their efforts helped make the event a success.

We also want to recognize **our crew at home**. Every successful sale represents months of work behind the scenes, including developing and evaluating the bulls, collecting data, coordinating health work, preparing sale materials, hauling cattle, and supporting customers. We are grateful for everyone whose dedication made this sale possible.
